WENZEL Academy - LEADING THROUGH KNOWLEDGE

WORLDWIDE COMPARABLE MEASUREMENT RESULTS
WENZEL ACADEMY

AUKOM SEMINARE

WORLD-WIDE COMPARABLE MEASUREMENT RESULTS

AUKOM seminars are pivotal in maintaining high-quality measurement practices in industrial production, ensuring that employees have the necessary knowledge and skills for accurate and reliable measurements.

The AUKOM seminars are an integral part of ensuring standardized and efficient production measurement technology in various industries,

The main purpose is to optimize teams by ensuring the time and costs spent are standardized to help streamline the quality assurance process. This underscores the

importance of consistent and reliable measurement practices.

Effective communication among all employees involved in the creation of measurement results is essential. It ensures that the knowledge and understanding required for accurate measurements are shared consistently throughout all relevant departments.

AUKOM seminars establish a common basic understanding based on knowledge. This shared knowledge is a foundational element for successful communication and accurate measurements.

HIGHLIGHTS

- **AUKOM is the independent industry standard in production measurement technology**
- **AUKOM seminars perfectly complement device-specific training courses**
- **Modular training with multi-level courses ensures continuous professional development**
- **Advanced metrology knowledge increases the reliability of your measurement results**
- **Globally successful - over 25,000 qualifications completed**

TRAINING FOR THE FUTURE

AUKOM forms the industry standard for training in production metrology no matter the brand machine your business uses.

This standard is represented by all coordinate measuring machine manufacturers and employees of industrial companies such as Daimler, VW, BMW, Bosch, etc., who have joined forces in the AUKOM e.V. association. More than 25,000 qualifications from diverse areas of technology have already been carried out.

YOUR ADVANTAGES AT A GLANCE

- **Worldwide comparable measurement results**
Reduce costs | Minimize scrap | Make profitable decisions
- **AUKOM trainers with many years of experience**
AUKOM qualified trainers | Regular training on the latest state of the art technology | Approved training and further education institution according to the AUKOM standard
- **Increase your measurement competence**
Complex knowledge of coordinate measuring technology | Multi-level and modular courses | Practically proven approach | Comprehensive and comparable training concept
- **Certified, device-neutral training**
Didactically designed seminar documents | E-learning system for basic education | Performing recognized final tests | Issue of AUKOM certificates
- **Two pillars provide security**
AUKOM seminars as a basis for certification as a coordinate measuring technician (WA)

PROGRAM OVERVIEW

	Modules	Duration
AUKOM	4	2 - 5 Days
WM QUARTIS	5	1,5 - 5 Days
AUKOM Management Workshop	1	2 Days

INNOVATION MEETS TRADITION

The WENZEL Group is one of the leading suppliers in the field of industrial metrology and styling solutions. WENZEL's product portfolio includes coordinate and gear measuring machines with tactile and optical sensors, multi-sensor systems, optical high speed scanning and 3D X-ray measuring technology based on computer tomography. In addition to these systems WENZEL also offers comprehensive metrology software, which is used by many thousands of users for the measurement and analysis of parts. WENZEL's measuring solutions

are used in various industries, including the automotive sector, aerospace, power generation and medical devices. Our solutions also support reverse engineering, inspection, and analysis for a variety of fields including power generation, vehicle electrification, and additive manufacturing. Over the years WENZEL has installed more than 12,000 machines worldwide. Subsidiaries and agencies in more than 50 countries support the sales and ensure the after sales service for our customers. The WENZEL Group employs more than 500 people worldwide.
